

Accelerating Clinical Data Exchange™

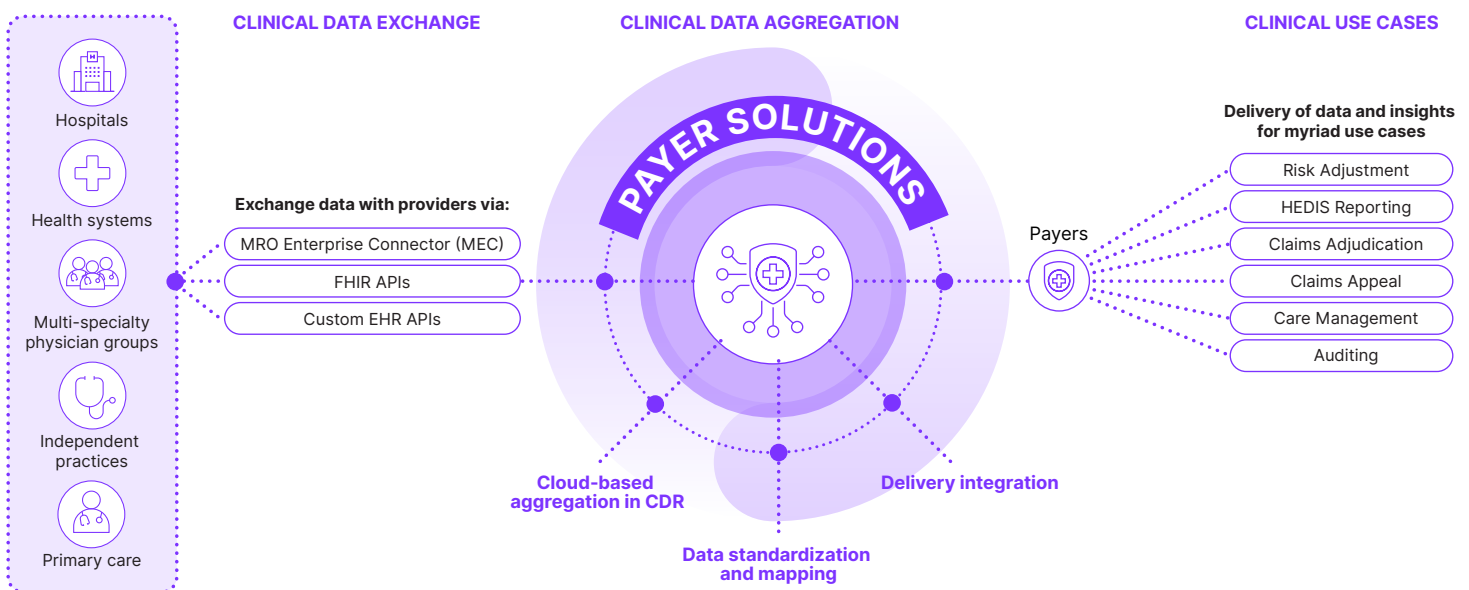

Booth #1041

## Break Down Barriers in Clinical Data Exchange with MRO

MRO's complete interoperability solution transforms how payers and providers collaborate, breaking down barriers in clinical data exchange across networks. Extract, aggregate, and standardize member data with support for 1000+ discrete elements and the ability to bring in unstructured data from clinical notes. View encounter data, procedures, family history, and more all in one place.

## Clinical Data Aggregation and Standardization for Multiple Use Cases

NCQA Data Aggregator Validated, eliminating the need for primary source verification by CMS for HEDIS supplemental data. An ever-growing network of providers, and connectivity with over 250 EHRs, practice management and laboratory information systems.
